Abstract:

DD 207630 A

Dispersant mixt. for the prodn. of liquid dyestuff dispersions of dyestuff components which are hardly soluble or insol. in water, e.g. disperse and pigment dyestuffs, which have a solubility in water of 0-100 mg/1 at 20 deg.C, consists of 20-80 (wt.)% oxyethylated alkyl alcohol or alkyl-phenol, 5-20% mono- or poly-hydric alcohol (n-BuOH), 0.5-15% organic solvent with a b.pt. below 130 deg.C, which is hardly soluble in water (toluene), rest water.

The mixt. avoids the usual drawbacks of difficulty in dissolution, at high energy cost; frothing during milling, and reserve of the dyestuff by the dispersant during fixing of prints.
